

Dairi Oussama Abderrahmane

✉ ko_dairi@esi.dz 🌐 oussachi 🌐 Oussama Dairi

EDUCATION

École supérieure en informatique de Sidi Bel Abbès 12/2020 – 06/2022

École Nationale Supérieure d'Informatique 09/2022 – 09/2025

Engineer's degree, Master's degree, Computer Science, Option: Computer Systems (SIQ)

Top Courses : Advanced Networking, Cybersecurity, High-performance Computing, Distributed Systems

PROFESSIONAL EXPERIENCE

Back-end Developer 10/2025 – Present
All Intelligence Solutions Remote

I am currently working as a freelance back-end web developer, working with Django, while also functioning as a code security auditor.

Research Intern 09/2024 – 07/2025
Laboratoire Informatique, Image et Interaction (L3i) La Rochelle, France

Worked on the topic "**LLM Multi-Agent System for Automated Exploitation of Network Vulnerabilities**", where I researched ways to leverage LLMs for the enhancement of cybersecurity operations, and implemented an LLM multi-agent system that automates with network exploitation.

Web developpment intern 07/2023 – 09/2023
IRIS / EURL SATEREX Setif, Algeria

Third year internship which I had at IRIS, an Algerian firm specialized in the manufacture of electronic products, as web development intern.

RELATED EXPERIENCE

CTF Player 2023 – present
noreply, th3_r0n1ns

CTF (Capture The Flag) competitions consist in competitive challenges that cover various topics of cybersecurity (web security, binary exploitation, cryptography, digital forensics, etc.)

- I participate with both teams **noreply** and **th3_r0n1ns**.
- I mostly solve binary exploitation and reverse engineering tasks.
- You can find some of my challenge write-ups **here** .

Cyber Security team leader 10/2023 – 06/2024
GDG Algiers

GDG Algiers is a local community and student's club situated at the Higher National School of Computer Science in Algiers (ESI ex INI), Algiers, Algeria. It is part of the big global community of developers "Google Developers Group".

- I was responsible for the club's cyber security related activities.

PROJECTS

INVEST

The result of my L3i internship, an LLM multi-agent system tasked with exploiting networking (TCP/IP) vulnerabilities, the work is available at <https://github.com/oussachi/INVEST> .

Development of security challenges for CTF competitions

I contributed to some national CTF (Capture The Flag) competitions (HackINI 2k24, DevFest Challenges 23) by creating security challenges that mostly fall into the Binary Exploitation and Reverse Engineering categories.

Network Configuration and SIEM Integration

For the fourth year project, I was in a team of 6 students working on the the configuration of a network and integrating a SIEM (Wazuh) using the GNS3 network simulator and VMware, where our simulated network included a firewall (pfsense), an IDS (Snort) and many machines.

Back-End Projects

I worked on many web development projects, specifically on the back-end, some of these projects include a train ticket reservation system, a social media for people suffering from addiction, a platform for renting/buying houses and a platform to help tourists navigate better.

SKILLS

Programming and scripting

Python, Bash, C, JavaScript, PHP, Java

Cybersecurity

Web security, Binary Exploitation, Reverse Engineering, SIEM, Network Security

Web development (back-end)

Flask, Django, Laravel, FastAPI

Miscellaneous

Linux, Git/GitHub, Networking
